Princeton & Montgomery Township
Mercer & Somerset Counties, New Jersey

Transcontinental Gas Pipe Line Company, LLC

WILLIAMS Informational Open House Event

Join us for an informational open house Thursday, April 11, from 6:30 – 8:30 pm at the Otto Kaufman Community Center: 356 Skillman Road, Skillman, New Jersey.

Williams operates the Transco natural gas pipeline, delivering much of the natural gas consumed in this region.

Williams is evaluating expanding a segment of the Transco natural gas pipeline in Somerset / Mercer counties, N.J. The company is studying expanding facilities along its pipeline right-of-way in Montgomery and Princeton townships, in addition to making modifications to its existing compressor facility in Princeton.

The proposal is currently in the planning phase. Williams is seeking early input from citizens, government entities and other interested parties to identify and address potential siting issues. You are invited to the public workshop to learn more about the proposal and the federal regulatory process, review maps and provide feedback. Williams anticipates finalizing a project proposal and filing a formal application with the Federal Energy Regulatory Commission (FERC) in the fall of 2013. A representative from FERC will be in attendance at the meeting.

We make energy happen.™
